

How can I control my Business Processes?

Without PRISM

- Business processes not integrated or controlled by the business system:
 - Manual systems and “tribal knowledge” are the controlling forces
- Waste is generated through inefficiency, lack of coordination, redundant efforts...
- “I’m not working on my highest value opportunities to contribute because I’m chasing mundane problems.”
- Coordination and collaboration on business processes is difficult

With PRISM

ProStar Integrated System Manager

- ▲ “Say what you do. Do what you say!”
- ▲ “Things that get measured get done!”
- ▲ “PRISM lets me focus on the high value opportunities!”
- ▲ Control of any business policy, process, procedure or work instruction
- ▲ Integration of the above through the natural flow of the QAD™ business system
- ▲ Performance measurement of business process execution
- ▲ Notifications and alerts of tasks that any given individual needs to accomplish in a business process
- ▲ Delivery of any document or file to the right person at the right time
- ▲ Coordination of complex processes and collaboration on shared processes
 - Managed tasks
 - Tracked status
 - Measured performance

PRISM

ProStar Integrated System Manager

PROSTAR ANNOUNCES PRISM

Why PRISM?

- ▲ Integrate the business processes with the business information system
- ▲ Improve business processes
- ▲ Measure performance
- ▲ Reduce costs
- ▲ Mandate compliance
- ▲ Achieve consistency and efficiency
- ▲ Operate more profitably
- ▲ Exceed customers' expectations

Rapid ROI from continuous improvement and increased value from your business system

Get more done with less work = "Easier than doing nothing!"

Control your business processes with PRISM!

- WorkFlow integration for your QAD™ applications
- Business Rules
- Logic Integration
- Process Flow
- Roles and Responsibilities
- Procedures & Training Content Display

PRISM includes:

- ▲ **WorkFlow Manager**
 - Object-based technology to define and control any business process
- ▲ **TailorPro Developers' ToolKit**
 - Productivity engine for rapid non-invasive customizations
- ▲ **TailorPro Run-Time**
 - Enhanced command execution engine
- ▲ **eLite**
 - No-programming-required interface for many common customizations

Technical Summary:

- Progress-based, object-based engine, schema and toolset
- Enables an unlimited variety of rules and actions in coordination of processes inside and outside of the QAD applications.
- WorkFlow Manager is based on and is additive to the TailorPro technology for Non-Invasive Customizations.
